Historical source: ERANARCHIA

continued from the previous page

E R A (sit) The onager, or wild afs, has, by fome authors, been confounded with the zebra; but very improperly, for this latit is a distinct species. for the onager is not freeskall for this, now is his shape of favourite. ~~"Wild~~ **Wild** also are fail to be very twift of ~~course's~~ **course's** and when they fee a man, they make a bound, and immedically fly away; I donuts, that there is no is king of them, but by vraps and guns. They have much the fame these as common affes; but they are of a brighter colour, and there runs a white lift from the head to the tail. Of the hides of theirs, and particularly of that part next the runny, they make that excellent leather which we call flagreen, and which is putto fo many curious uses. In America they have ~~nooffs~~ **no affes** at all, nor yet ~~horles;~~ **horfes;** but they have been carried thither long ago, ~~atift~~ **at first** by the Spaniards, and afterwards ~~byother~~ **by other** nations, where they have ~~multiple~~ **multiplied** greatly; ~~ionomisch, that,~~ in fome places, there are whole ~~drows~~ **droves** of them that run wild, and are very hard to be caught. Afes in general carry the ~~bloodwell borders~~ **heaviest burdens** in proportion to their bulk; and, ~~a~~ **as** their keeping ~~coll~~ **costs** little or nothing, it is a great wonder they are not put to more ~~ufes~~ **uses** than they generally are among us. The flesh of the common afs is never eaten in thefe parts of the world; though ~~home~~ **fome** pretend their colts are tender, and not difagreeable. [Plate LXXV. fig.2] 5: The idea—This animal has the figure and gracefulness of the horse, claimed to the firstness of the flag. He is about 7 feet long, from the point of the muzzle to the origin of the tall, and about, feet high. The colon of his him is beautiful and uniform, confiling of alternate parallel rings of black and white dipuled in the melt regular manner, as reprefeden in the place, lEXXY, fig.3]. He is generally left than the horse, and larger than the afsl. ~~'the~~ **the** Zebra is found no where but in the others and fourteen provinces of Africa, New Ethiopia to the Cape of Good Hope, and from the Cape of Good Hope to Congo. The Dutch have been at great pains to tame and die them for domestic purposes, but with little friends. He is in half monthock, and kicks when any person attempts to touch or come near him. He is scellle and oblitiare as a multe : but perhaps the wild holde is naturally as unsuitable as the Zebra; for, it is probably. If were early occultured to obdelense and a domelie life, he would become as docile as the horle.

ERANARCHIA

ERANARCHIA, a public officer among the ancient ~~Greek, which bullets~~ **Greeks, whose business** was to ~~pedide~~ **preside** over and direct the alms and ~~provins~~ **provisions** made for the poor. Cornelius Nepos, in his ~~lit~~ **life** of ~~Espainindodas, deferibes~~ **Epaminondas, describes** his office ~~thus;~~ **thus:** when any ~~period~~ **person** was reduced ~~so~~ **to** poverty, taken captive, or had a daughter to marry, which he could not effect for want of money, ~~etc.~~ **&c.** the eranarcha called an ~~offender~~ **assembly** of friends and neighbours, and taxed each according to his means and ~~ethars,~~ **estate,** to contribute towards his relief.

ERANTHEUMUJ

ERANTHEUMUJ, in botany; a genus of the diandria, menogyalda. The coloris its divided into five tagments if the tribe is filomn y and the flagan is limple. There is but one facies, a native of Ethiopia.

ERASED

ERASED, in heraldry. See ARRACHE.

RECTION

~~RECTION,~~ **ERECTION,** in a general ~~fence,~~ **fenfe,** the art of ~~railing~~ **raifing** or elevating any thing, as the ~~ereation~~ **erection** of a perpendicular, ~~or.~~ **&c.** It is ~~all collected~~ **alfo ufed** in a figurative ~~leafe,~~ **fenfe,** as the ~~ereotion~~ **erection** of a ~~abhorgic, inauguralus, etc.~~ **bishopric, marquifate, &c.**

REECTOR CLITORIS

~~REECTOR~~ **RECTOR** CLITORIS. See ClUTORIS.

REKCTOR PISIS

~~REKCTOR~~ ***RECTOR*** *PISIS. See FISIS.*

REBMIT

~~REBMIT.~~ ***EREMIT.*** *See ~~HEMIT.~~* ***HERMIT.***

REBMITA

~~REBMITA,~~ ***EREMITA,*** *in ~~ecology.~~* ***zoology.*** *See ~~SCARASRUS.~~* ***SCARABAEUS.***

ERFURT

ERFURT, a large and beautiful city of Upper Saxony in Germany, capital of ~~Thailand,~~ **Thuringia,** and subject to the ~~elekor~~ **elector** of ~~Menus;~~ **Mentz:** E. ~~long.117 é', N.lax. 910.~~ **long. 11° 6', N.**

ERGOT

ERGOT, in ~~farriers,~~ **farriery,** is a ~~flub,~~ **ftub,** like a piece of ~~loft~~ **fott** horn, about the ~~biguns~~ **bigness** of a ~~chefut,~~ **cheftnut,** placed behind and ~~be low~~ **below**

the ~~pattern join,~~ **pattern-joint,** and commonly ~~hide~~ **hid** under the ~~tufi~~ **tuft** of the fetlock.

ERICA

ERICA, or ~~Hearth,~~ **Heath,** in ~~benny,~~ **botany,** a genus of the ~~otherdirina nonogona clade.~~ **octandria monogynia class.** The ~~calise conflict~~ **calix consists** of four leaves, and the corolla of four ~~fragments;~~ **segments;** the filaments are ~~infected~~ **inserted** into the receptacle; the ~~anthem~~ **anthers** are ~~bid;~~ **bifid;** and the ~~copilole~~ **capsule** has four cells. ~~Three thirty eight-species, one~~ **There are thirty-eight species, five** of which are ~~native~~ **natives** of Britain, viz. the vulgaris, or common ~~health;~~ **heath;** the ~~cinerers,~~ **cinerea,** or fine-leaved ~~hearts;~~ **heath;** the ~~retraix,~~ **tetralix,** or ~~crofs-leaved heads;~~ **cross-leaved heath;** the ~~cillaray,~~ **ciliaris,** or ~~rough leaved heat;~~ **rough-leaved heath;** and the ~~multidots,~~ **multiflora,** or ~~firleaved heart.~~ **fir-leaved heath.**

ERIDANUS

ERIDANUS, in ~~altonomy.~~ **aftronomy.** See Vol. I. p. 487.

ERRI

~~ERRI,~~ **ERIE,** a ~~wall take~~ **vault lake** to the ~~wellhead~~ **weftward** of ~~Penfilivana,~~ **Penfilivania,** in North America, ~~finances~~ **fituated** between ~~80^~~ **80°** and ~~89^~~ **87°** W. long. and between ~~41^~~ **41°** and ~~42^~~ **42°** N lat.

ERGGERON

~~ERGGERON,~~ **ERIGERON,** or ~~SWART PISTA BANS,~~ **SWEET FLEA BANE,** in botany, a genus of the ~~flygregering polyanthus/perchia clad.~~ **syngenesia polygamia superflua clasfs.** The receptacle is ~~nabf;~~ **naked;** the pappus ~~in~~ **is** hairy; and the ~~codiif~~ **radii** of the corolla are linear and very narrow. There are ~~sixteen~~ **fifteen** species, ~~and~~ **two of** which are ~~native~~ **natives** of Britain, viz. the ~~actar~~ **acre,** or blue-flowered flea-bane; and the ~~canadenfe,~~ **canadense,** or Canada flea-bane.

ERNIACEUS

ERNIACEUS, or ~~Harca dose~~ **Hedge-hog** in biology, a genus of arthropods belonging to the order of ferns, the characters of which are ~~thefel;~~ **thefelf;** they have two ~~foresteeth~~ **foreteeth** in the upperpaw, at a considerable distance from one another, and won in the under jaw. leaf claffant; and they have two recombinant dogtetth, one on each file. There are three facies, viz. 1. The europeus, or common hedgehog, with round cars, and certified no-frilk. It is about nine inches than the year of the body is usually covered with flap prticles, and the under part is covered with hair. The hedgehog, even when flanked on hijings, has a very ugly affect. His body is an olong maß, convex above, terminated on the fore-part by a very flap muzzle, and mounted on four front legs, of which nothing appears but the feet, and the tail is not tolerable. His ears are broad, round, and short; and his eyes are small and prouberant. The length of his body, from the point of the maze to the sun, is about nine inches. The hedgehog has a very uncommon method of defending himself from the attacks of other animals being ~~purified~~ **purfled** of little ~~through~~ **ftrength** or agility, ~~lie~~ **he** does not attempt to fly from ~~to affill in corners;~~ **or affail his enemies;** but ~~stretch~~ **erects** his ~~brillies,~~ **briftles,** and rolls himself up like a ball, exposing no-
